PROFESSIONAL SUMMARY

Software Developer skilled in frontend and backend development, API consumption, and building user-centered applications. Strong problem-solver with a Business IT background, experienced in creating responsive interfaces, scalable systems, and delivering practical technical solutions. Adaptable, collaborative, and passionate about continuous growth and innovation.

TECHNICAL SKILLS

Languages: JavaScript, Python (Flask), HTML5, CSS3, SQL
Frontend: React.js, Angular, DOM Manipulation, Responsive Design
Backend: Flask, RESTful APIs, SQLAlchemy, Authentication
Tools: Git, GitHub, JSON Server, Postman, VS Code, Linux Terminal
Database: SQLite

PROJECTS

Smart Laundry Application (Frontend) *Angular, Spring Boot*
[Live Demo](#)

- Developed the frontend interface of a full-stack laundry service application enabling users to book laundry services, schedule pickup and delivery, and complete checkout seamlessly.
- Designed user flows for booking orders, tracking pickup/delivery status, and real-time updates to improve user convenience and transparency.
- Built responsive UI components, ensuring smooth user experience across devices (mobile and desktop), and handled form validation, user input, and interactive feedback.
- Collaborated with backend services built on Spring Boot to consume RESTful APIs for order management, authentication, and status updates.
- Ensured the application is production-ready: deployed on Render, enabling live access and real-world use.

Budget-Smart Application *React, Flask, SQLite*
[GitHub](#)

- Built a personal finance tool with budgeting, expense tracking, and secure authentication.
- Created RESTful APIs and a responsive React UI with full CRUD functionality.

Weather Application *JavaScript, API Integration*
[GitHub](#)

- Developed a responsive weather dashboard using OpenWeather API.
- Implemented search, forecasts, and clean UI optimized for all devices.

EXPERIENCE

Frontend Developer – R&D *Aug 2025 – Nov 2025*
Eclectics International, Nairobi

- Developed enterprise Angular applications using scalable design patterns.
- Integrated Spring Boot APIs, including real-time GPS tracking.
- Built prototype features and contributed to UI/UX improvements within the R&D team.

IT Attachée *Aug 2022 – Nov 2022*
NHIF, Elgeyo Marakwet

- Supported development and maintenance of internal healthcare systems.
- Participated in testing, feature updates, and system troubleshooting.

EDUCATION

B.Sc. Business Information Technology (Upper Division) *2019–2023*
Jomo Kenyatta University of Agriculture and Technology (JKUAT)

KCSE, Grade B *2016–2019*
Kereri Girls High School

KCPE, Grade B *2007–2015*
Kokwongoi Connector Academy

CORE COMPETENCIES

- Problem-Solving
- Adaptability
- Fast Learner
- Team Collaboration
- Detail-Oriented
- Strong Work Ethic
